

Toyota Smartphone Integration

ALWAYS A
BETTER WAY

android auto

A smarter, safer way to use your Android phone in the car.

Take/place handsfree calls
via Bluetooth

Send/receive messages
via voice commands

Get Google Maps or Waze navigation
in your car's display

Enjoy music
Google Play Music, Spotify, TuneIn Radio and more

WHAT YOU NEED TO KNOW

Phone requirements:

- Phone running Android 5.0 or higher
- Connected to car's multimedia system via certified USB cable
- Android Auto uses your phone's data

It's all about safety:

- You should not use your phone when it's plugged in
- Google determines which apps and functionality are allowed during driving

SET UP IN 4 EASY STEPS

1

Install App

Download from Google Play*

*Depending on local availability

2

Connect USB

Plug phone in to multimedia system

3

Configure phone

Allow access to necessary phone functions

4

Select App

Open Android Auto on your car's multimedia screen

HOW TO USE

Touch the screen or just say 'OK, Google' (recommended)

'OK Google, call John Smith'

'OK Google, let's go home'

'OK Google, text my boss I will be late'

'OK Google, play Final Countdown'

Tip: Ask Google for weather, POI, fuel stations, supermarkets, restaurants or even to set calendar reminders
